

Safety Passport Live Events

Presented by

Course objectives:

- To provide information and training relevant to Live Events in respect of concerns for health, safety and the environment, to support the continued improvement of such standards throughout the sector.
- To understand the implications for cost, business, job security and risk of injury if concerns for the environment and health and safety are not properly considered.

Course content:

On completion of the course delegates will have the knowledge to:

- Demonstrate their understanding of the subjects by successfully completing each module assessment paper
- Appreciate how they personally can influence good standards within health, safety and the environment
- Understand the value of risk assessment and have the knowledge to recognise when change to a generic assessment is required
- Understand the common hazards associated with working in the Live Events sector

Module 1 – Organising for Safety

On completion of Module 1 candidates will be able to demonstrate an understanding of the legal responsibilities of employers and employees, understand the role of the Enforcing Authorities and the nature and practice of risk assessment in the workplace:

- Overview of health and safety law
- Responsibilities of employers/employees
- Risk Assessment

On completion of Module 2 candidates will be able to demonstrate an understanding of what makes a safe place of work and specific hazards which present risk in the workplace:

- Principle of a safe place of work
- Safe behaviour
- Safe Access and exits
- Temperature, lighting, housekeeping, welfare

- Slips and trips
- Display screen equipment
- Environmental hazards
- Reporting failures and defects
- Safe work at heights

Module 3 – Tools, Plant and Machinery

On completion of Module 3 candidates will be able to demonstrate an understanding of the hazards presented by both powered and none powered work equipment in the workplace, forms of energy and associated hazards and risks faced with the use of workplace transport:

- Work equipment
- Machinery
- Electricity
- Workplace transport

Module 4 – Health

On completion of Module 4 candidates will be able to demonstrate an understanding of risks and associated control measures presented by substances hazardous to health, together with other ill health risks from workplace activities, giving rise to musculoskeletal problems and the effects of noise and stress:

- Noise
- Controlling harmful substances
- Specific health hazards – hazardous materials
- Personal protective equipment
- Health surveillance/monitoring
- Manual handling
- Musculoskeletal disorders
- Stress

Module 5 – Procedures

On completion of Module 5 candidates will be able to demonstrate an understanding of the need for a permit- to-work, the need to know local emergency procedures and first aid arrangements:

- Safe systems of work including permits
- Emergency procedures
- Fire safety
- Reporting accidents and incidents
- First aid

Module 6 – The Environment

On completion of Module 6 candidates will be able to demonstrate an understanding of the current environmental requirements, waste control hierarchies and emergency planning in the event of problems together with the requirements for safe storage and disposal:

Introduction

- Key legislation
- Responsibilities of employers and employees

Environmental concerns in the workplace

- Causes of on/offsite pollution
- Pollution prevention

Emergencies

- Planning
- Procedures

Waste

- Management, segregation and minimization
- Safe and secure storage

Health & Fitness Statement

If you have any problems with literacy or language comprehension, you must bring this to our attention. This need not preclude you from coming to our training provided your employer/college/the trainer conducts an assessment and is able to put into place adequate measures to take account of any difficulties you may have.
